PROFESSIONAL PROFILE

As a professional software developer, I specialize in web development using technologies such as PHP along with the Symfony and Drupal frameworks. I possess the necessary skills for backend development (agile methodologies, software lifecycle) and have acquired expertise in frontend technologies for new projects, including JS, CSS, jQuery, ReactJS, VueJS, Python and HTML5.

I also engage in mobile application development, both hybrid and native, using Kotlin, Ionic, and Java, while managing version control with Git.

In the realm of databases, my focus lies in MySQL, SQL, and SQLite. I have gained these skills through practical experience over the past four years since I began my development journey.

My knowledge continues to expand through the various projects I've been involved in since the beginning of my studies. Along the way, I've learned new technologies such as Golang, Laravel, Angular, and React Native. In addition to mastering these technologies, my goal is to achieve effective and robust results, considering the intricacies of the software lifecycle.

PERSONAL PROFILE

I consider myself a person with excellent interpersonal skills, characterized by an open, frank, and respectful attitude. I am adept at establishing cordial work relationships, fostering a productive environment, and committing to the company's objectives to contribute to overall efficiency and productivity.

EXPERIENCE

WEB DEVELOPER   (Nov. 2019 – Aug.2022)
OPTIME CONSULTING - Bogotá, Cundinamarca
Currently, I work in the Backend area, utilizing technologies integral to web development such as PHP, Symfony, MySQL, RabbitMQ, ReactJS, VueJS, TurboJS, HTML, JS, CSS, and React. My responsibilities span from planning, estimating, control, and data analysis to delivering a rigorously tested product. I collaborate on projects for clients such as Lenovo, HPE (Aruba), Fortinet, as well as internal projects.

WEB DEVELOPER SEMI SENIOR 2   (Aug. 2022 – Currently)
BITS AMERICAS - Bogotá, Cundinamarca
My profile is focused on Backend development, utilizing PHP from version 5 up to the latest, currently 8.3. I have experience in handling APIREST within the ONEAPP infrastructure, where we immerse ourselves in technologies such as web components and Drupal 8 and above. Additionally, I manage tickets in JIRA using the agile Scrum methodology, collaborating on projects with clients like TIGO, which involve both B2B and B2C aspects.

EDUCATION

UNIVERSITY COMPENSAR   (2024 – Currently)
CYBERSECURITY SPECIALIZATION — Bogotá, Colombia

2024
