

ABOUT ME

With 7 years of experience, I have evolved as a Semi Senior Web Developer, consolidating my skills in various technologies. My career has been characterized by constant adaptation to new challenges and continuous learning. I have honed my ability to solve complex problems and collaborate effectively in multidisciplinary teams. I aspire to continue growing professionally, leading innovative projects, and contributing to the success of the organization.

SEMI SENIOR WEB DEVELOPER 2

- My profile is focused on Backend development, NODEJS and PHP from version 5 to the most current version 8.3. managing APIREST with the ONEAPP infrastructure, here we are immersed in technologies such as web-components, and drupal 8 superior.
- Handling Tickets in JIRA with the agile Scrum methodology, with Clients like TIGO whose projects are B2B and B2C.

WEB DEVELOPER

- I currently work in the Backend area with web development technologies (PHP, SYMFONY, MYSQL, RABBITMQ, REACTJS, VUEJS, TURBOJS, HTML, JS, CSS, REACT) from planning, estimates, control, data analysis, to the delivery of a strictly tested product for clients like Lenovo, HPE (Aruba), Fortinet and internal projects.

DRUPAL DEVELOPER

- I work in backend and frontend, implementing custom modules, responsive themes, and advanced functionalities with Web Components and TypeScript.
- I also optimize sites hosted on Pantheon, managing deployments, performance, and updates.
